## Short Description

ZombieVerter VCU V1.

Designed to provide an all-in-one vehicle control unit for EV conversion projects.

Fully configurable via WiFi using the Openinverter ecosystem.

Enclosure and connectors NOT supplied. Please see attached BOM

Please see the relevant support thread on the OpenInverter forum linked below for details

Soldering required

June ' 24 Update : 4 SOIC parts are not populated but supplied in the kit and must be soldered to the board.

This device controls an ever growing list of drivetrains, chargers and accessories via CAN/Serial interfaces.

Most recently added CCS DC Fast Charge via the BMW i3 LIM module!

Price includes worldwide tracked postage.

Fully open source project.

Support via the [openinverter.org](https://openinverter.org) forum.
